COCO

PET CARE

The tag that talks back.

A QR pendant, a one-page profile, and a stranger who can help in under ten seconds.

by U-Design · Al Ain, UAE

THE PRODUCT

One pendant. Ten colours. Zero apps to download.

Cat-head acrylic, split ring, laser-clean QR. It lives on the collar, not in a drawer.

Why acrylic, not metal

- Lighter on a cat's neck than a steel disc
- Silent — no jingle against a food bowl
- Colour is the personalisation, so no engraving delay
- Cheap enough to replace if it's ever chewed

WHY NOW

The UAE pet population nearly doubled in ten years.

938,000 pets in 2024, up from 588,700 in 2014. Source: USDA Foreign Agricultural Service, 2025

$219M

UAE pet food retail in 2024 — up from $61.8M in 2014. Over 250% growth in a decade.

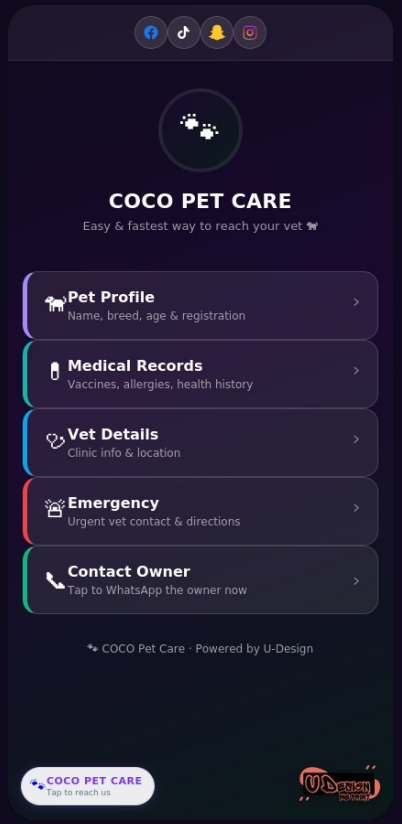

2 : 1

Cats outnumber dogs in the UAE. Persian is the most popular breed at roughly 37% of cat owners.

THE WEBSITE

This is the whole thing.

No app store. No login. No onboarding. A stranger scans and lands here.

1 **One screen**

Everything a finder needs is above the fold. Nothing to scroll past.

2 **Five taps, five answers**

Profile, medical, vet, emergency, owner. Each opens in place — no page loads.

3 **WhatsApp-first**

Contact Owner opens WhatsApp directly. The UAE already lives there.

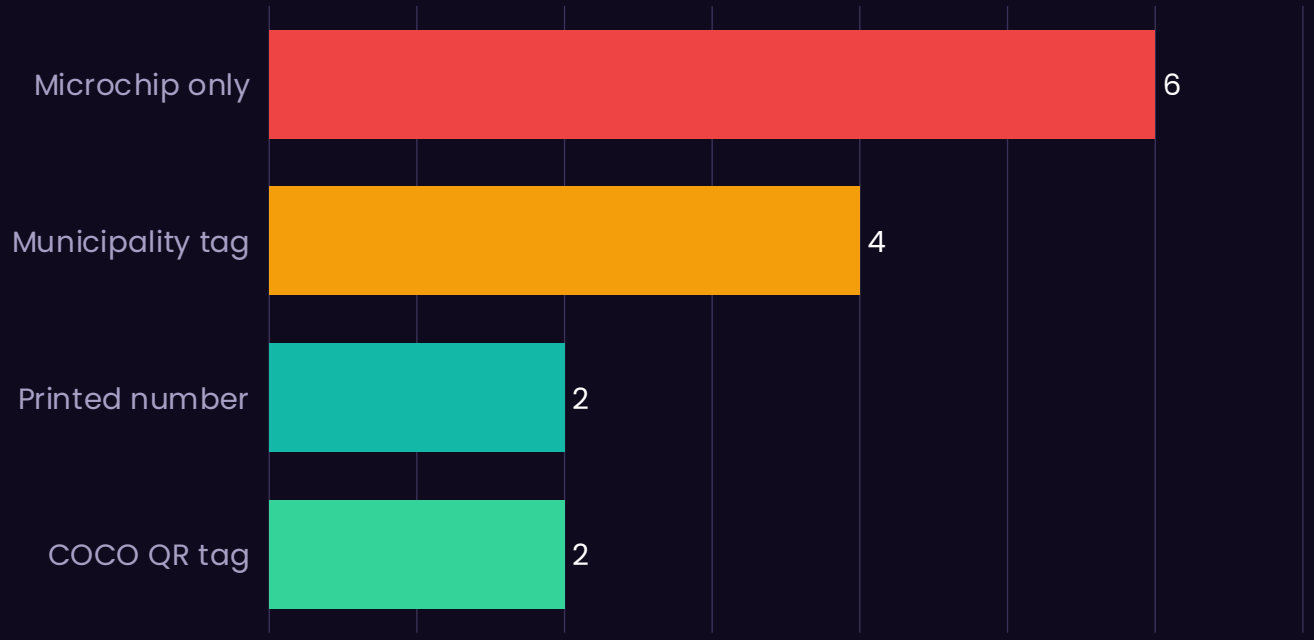

4 **Works on any phone**

Plain HTML. No app, no account, no Bluetooth, no battery.

DESIGN DECISION

Minimal is not a style choice. It is a speed requirement.

The person scanning your cat's tag is a stranger holding an animal that wants to run.

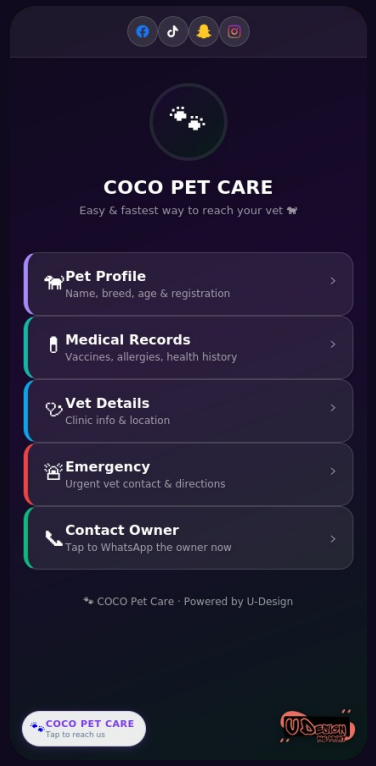

What each path costs

- COCO — point camera, tap notification. Done.
- Printed number — readable only if it hasn't worn off.
- Municipality tag — the finder must call the municipality in office hours.
- Microchip — needs a clinic, a scanner and a car. Useless at 11pm.

HOW IT FUNCTIONS

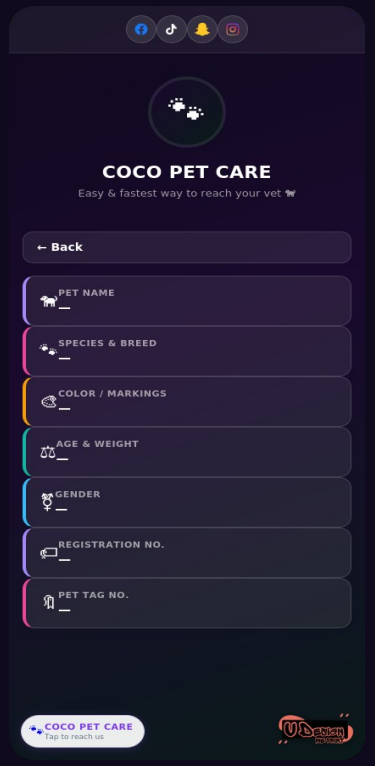

Every card opens a real page.

Same screen, no reload. The finder never leaves the tab they landed in.

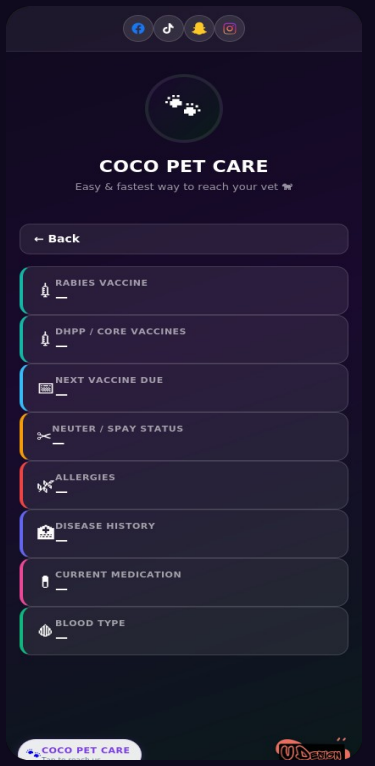

Home

Five routes, one screen

Pet Profile

Name, breed, markings, tag no.

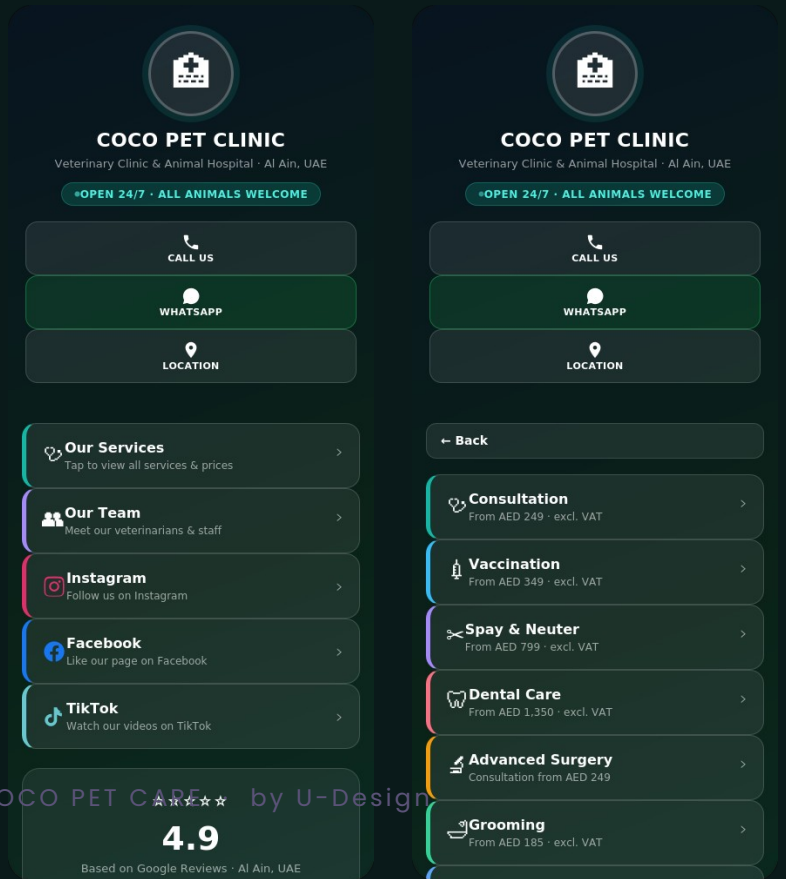

Medical

Vaccines, allergies, blood type

FOR CLINICS

The same engine, wearing the clinic's colours.

A booking funnel that lives on a cat's neck — not a business card in a drawer.

Call, WhatsApp, Location

Three taps at the top. Every one is a conversion.

Ten services with prices

The owner sees the grooming price before they think to ask.

Team and socials

Trust built in, Instagram and TikTok linked.

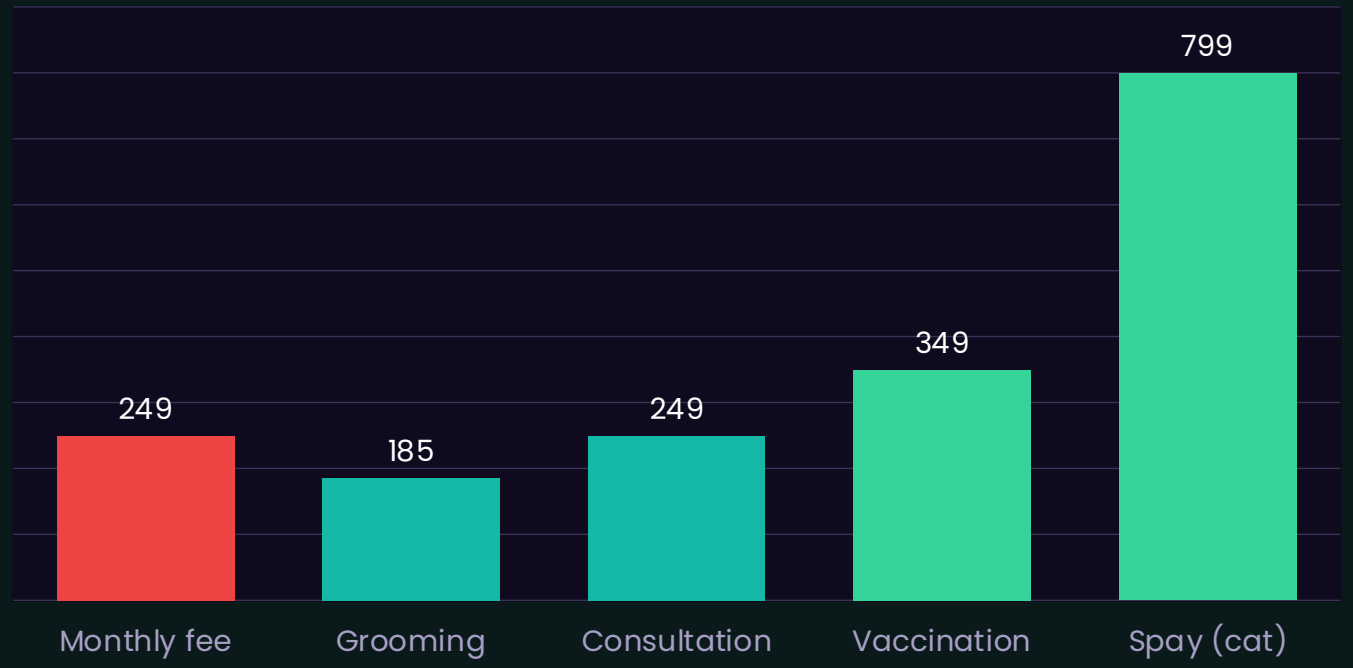

Google review CTA

The hardest ask in the business, made one tap.

CLINIC ECONOMICS

One extra booking a month pays for the whole thing.

Monthly partner fee is AED 249. Set against the clinic's own price list, here is what it takes to break even.

1.4

grooming bookings a month and the partner fee is already paid for.

Every scan

is a reminder. The owner fails at bath time, scans the tag, and finds grooming from AED 185.

PRICING

Four steps. Each one buys something you can say out loud.

STANDARD

AED 35

delivered

Name tag
No QR
No renewal

CLASSIC

AED 60

delivered

Static QR page
Locked details
No renewal

VIP

AED 75

+ AED 60/yr

Editable forever
Emergency Mode
First year free

VVIP

AED 120

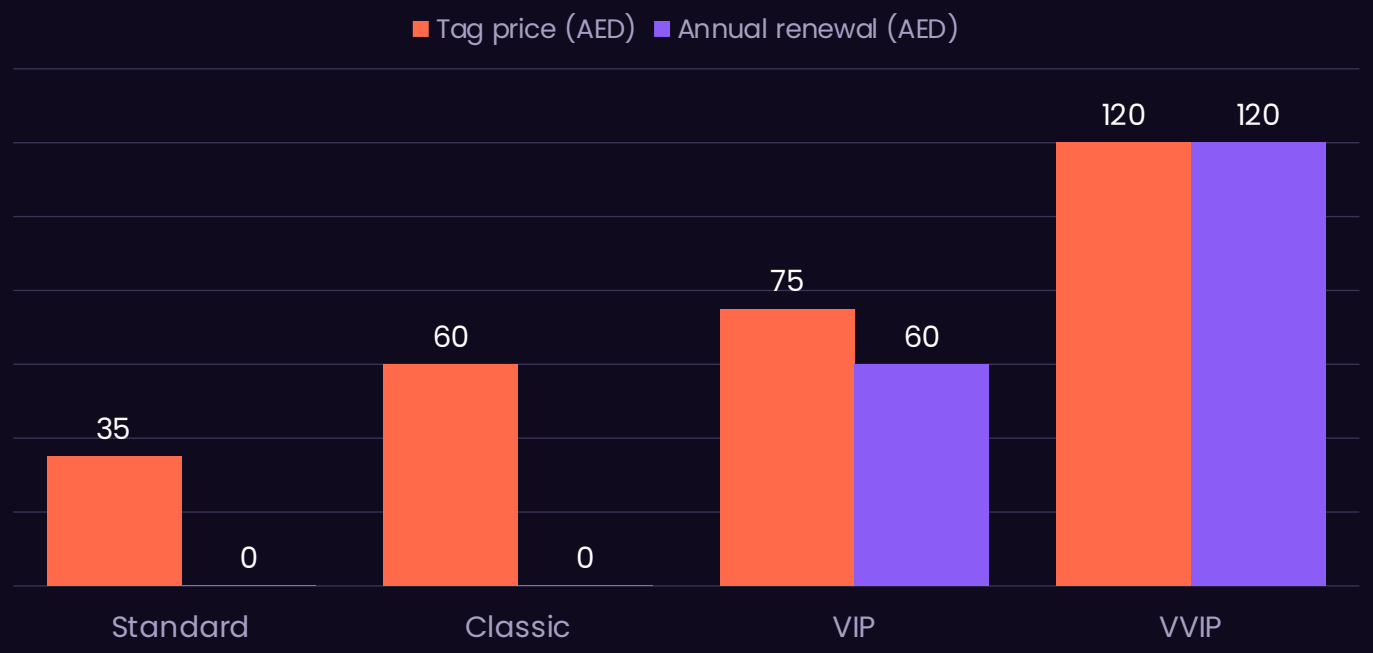

+ AED 120/yr

Full medical record
Vaccine reminders
Unlimited edits

THE LADDER

The less you pay, the less it does.

A clean climb — 35, 60, 75, 120. Nothing above the floor feels like a rounding error.

Feature climb

Standard · a name

Classic · a page that can't change

VIP · a page that changes forever

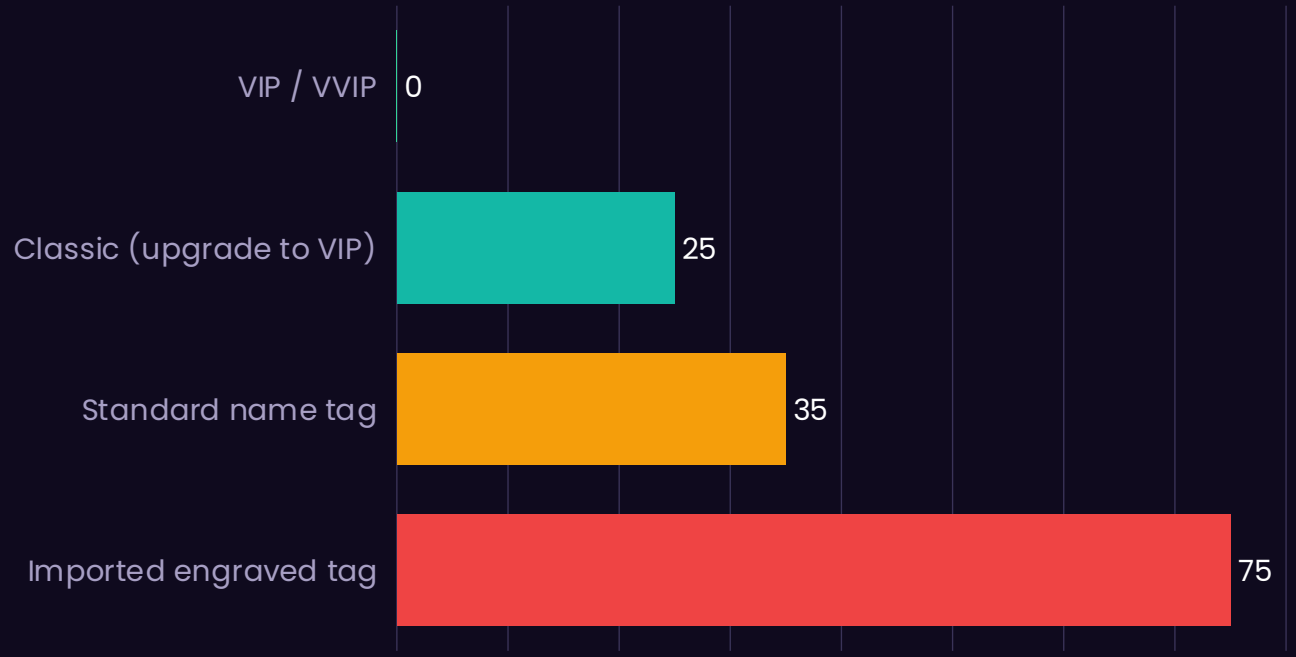

VVIP · a page that remembers, and reminds

Upgrade a Classic to VIP for AED 25 — same tag, no reprint.

THE REAL DIFFERENCE

Engraving is permanent. So is the mistake.

Change a phone number, an address, an emergency contact, a vet, a photo. The tag never moves.

Correcting a mistake means buying the tag again — unless the page behind it can be edited.

What actually happens

A customer orders a tag. Two days later they notice
one digit of the number is wrong.

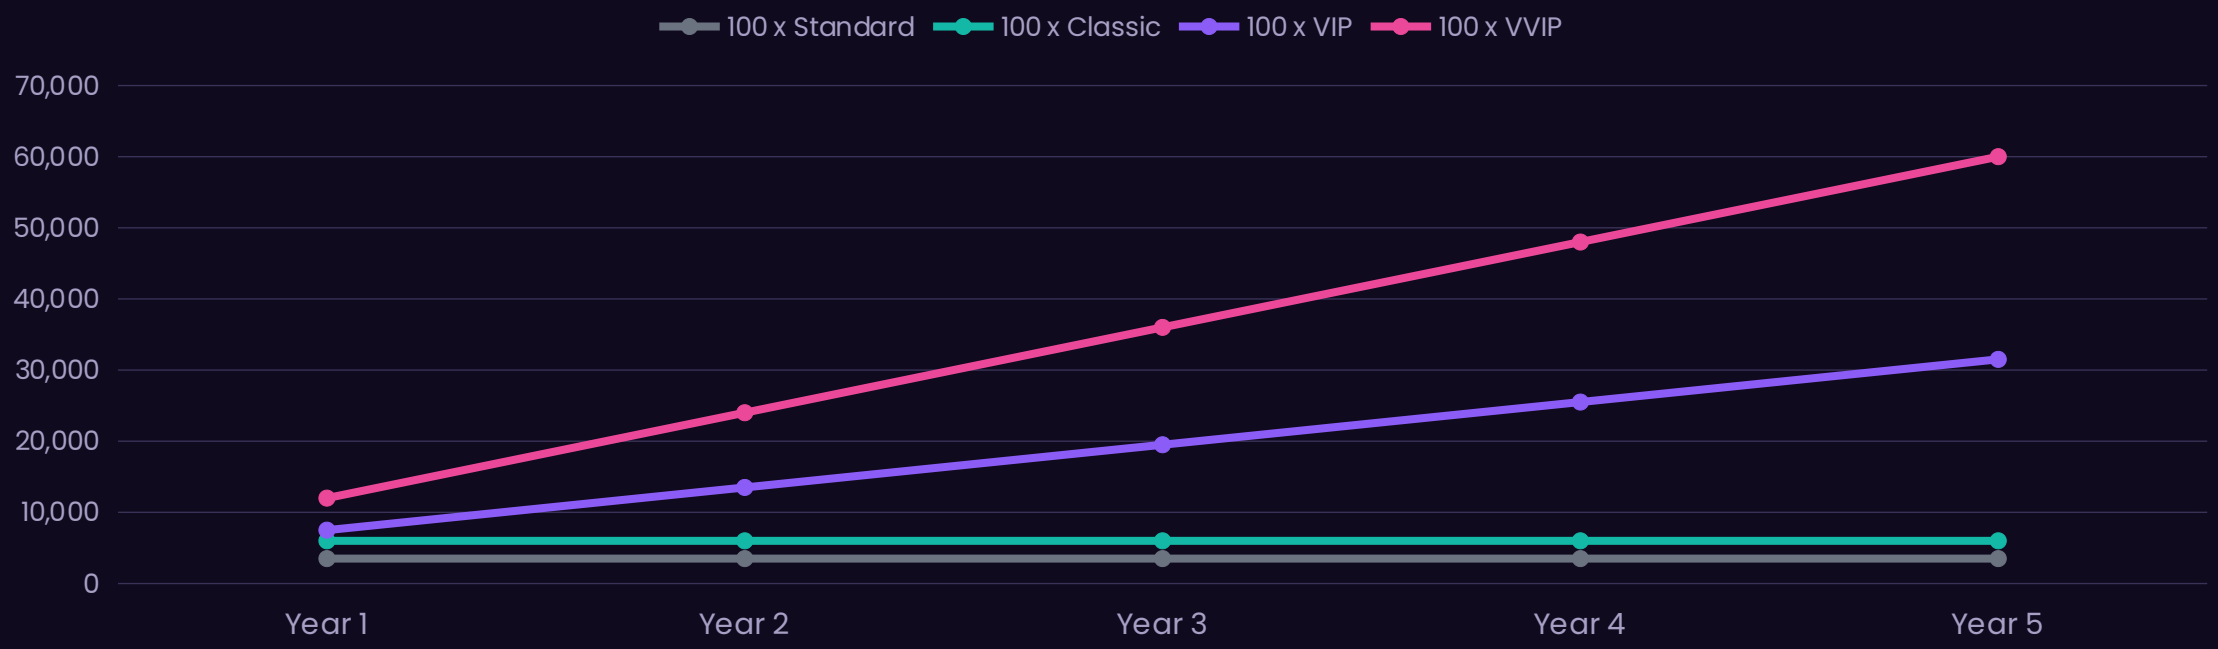

With engraving, they buy another tag.

With COCO, they send one WhatsApp and it is fixed
the same evening — same tag, same collar, same cat.

THE MODEL

The tag is the sale.
The renewal is the business.

Illustrative — cumulative revenue from 100 customers on each tier, assuming all renew. Figures are arithmetic from the price list, not a forecast.

EMERGENCY MODE

One message from the owner. The page changes state.

VIP and VVIP only. The tag stops being an ID card and becomes a search party.

Red across the top

THIS PET IS LOST. Nobody has to interpret anything.

Owner contact first

Everything else drops below the fold.

Last seen + reward

Optional, shown only if the owner supplies it.

AI-assisted lost post

We prepare a shareable social post from the approved details.

Protect the pet.
Connect the people.

A QR pendant is not a promise that your cat comes home. It is one more line of defence — and it costs less than one printed lost-pet poster.
